LinkedIn Profile: Vincent Anyanwu

PROFESSIONAL SUMMARY

An innovative and high-achieving Mechatronics Engineering student with full-stack development, modelling and graphics design capabilities. Experienced in deploying modern JavaScript ecosystems, and CAD/simulation frameworks to build high-performance solutions. A strategic problem-solver with a proven track record of e-commerce launch execution, scalable workflow automation, and production optimization.

TECHNICAL & CORE COMPETENCIES

- Full-Stack Software Engineering:** React.js, Tailwind CSS, Node.js, Express, JavaScript (ES6+), Python, SQL, MongoDB, Git/GitHub, AI Coding Agents & Custom APIs.
- Systems Engineering & CAD Modeling:** SolidWorks (Advanced Part/Assembly Modeling), MATLAB Simulation.
- Digital Branding:** Adobe Creative Suite (Photoshop, Illustrator), Canva.

PROFESSIONAL & PROJECT EXPERIENCE

Founder & Lead Developer | Vast Nation (E-Commerce Brand)
November 2025 – Present

- Platform Architecture:** Architected and deployed a highly responsive, full-stack e-commerce web platform utilizing modern web frameworks, optimizing frontend performance and mobile rendering for better experience.
- Workflow Automation:** Built and integrated high-leverage AI workflows and content automation agents to streamline multi-platform brand expansion and operational efficiency.
- Market Launch:** Spearheaded a targeted LinkedIn digital campaign to debut the brand website, successfully capturing early organic web traffic and digital engagement.

Freelance Full-Stack Developer & Graphic Designer | Self-Employed
March 2019 – Present

- End-to-End Delivery:** Scope, develop, and deploy production-ready web applications for diverse clients, maintaining clean code architecture and secure backend databases.
- Identity Design:** Author comprehensive brand identity guidelines, designing high-fidelity logos, graphics, and visual assets tailored to client market positioning.

Engineering Design & Industrial Training Coordinator | Technical Projects
April 2026 – May 2026

- Mechanical Product Design:** Successfully completed an intensive 30-day product development challenge (Engineers.360), modeling high-fidelity mechanical assemblies including engine pistons and rotational shafts and more in SolidWorks.
- Control Systems Research:** Conducted data-driven research on LQR active suspension systems, developing custom MATLAB scripts for speed-dependent performance testing and ISO-compliant comfort evaluations.

EDUCATION

Bachelor of Engineering (B.Eng.) in Mechatronics Engineering

Expected Graduation: 2028

Bells University Of Technology, Ota, Ogun State.

Core Focus: Robotics & Automation, Machine Design, Computer-Aided Engineering (CAE).

West African Senior School Certificate (WASSCE) | Graduated: 2023

CMS Grammar School, Bariga, Lagos State.

Academic focus on Science and Technical subjects (Mathematics, Physics, Further Mathematics, Technical Drawing).

CERTIFICATIONS & PUBLICATIONS

- **Certification:** Certified Graduate, Engineers.360 30-Day Product Development Challenge (May 2026)
- **Research Output:** Speed-Dependent Performance Analysis of LQR Active Suspension Systems (2026)
